

Woodward easYgen

is designed for a single-generator set used in critical stand-by or prime power applications with automatic changeover capability. The controllers include purposebuilt algorithms and logic to start, stop, control, and protect the genset, open/close circuit breakers and mains supply monitoring with automatic changeover. Equipped with state-of-the-art communication interfaces

SMARTGEN

Automatic Battery Charger Design in switching power structure, wide range of AC voltage input, small volume light weight, and high efficiency; Two stage charging method (constant current firstly and then constant voltage), fully considering charging property of the lead acid battery, can avoid overcharging and extend battery life to the fullest, With short circuit and reverse connection protection.

SWG Genset Starting Battery*

- High Performance Generator Sets Battery Maintenance Free
- Nano-Technology, reducing the possibility of batteries catching fire for providing less flammable electrode material.
- Increasing the available power from a battery and decreasing the time required to recharged a battery. (unit may vary)

Color and Design may vary*
